Software Engineering undergraduate with hands-on experience in Machine Learning, Python-based web applications, API development, and data preprocessing. Skilled in building and deploying ML models using FastAPI and Streamlit, with strong communication and problem-solving skills.

Technical Skills

- Programming & Frameworks: Python, FastAPI, Streamlit
- Machine Learning & AI: Supervised & Unsupervised Learning, Model Training, Feature Engineering, RAG, Bias Detection
- Data Tools: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn
- Web & APIs: REST APIs, API Integration
- Soft Skills: Communication, Analytical Thinking, Problem Solving

PROJECTS

Machine Learning Models Development

- Built and trained classification and regression models
- Performed data preprocessing, encoding, normalization, and scaling
- Evaluated models using accuracy, F1-score, and confusion matrix

Python Web Applications

- Developed interactive ML applications using Streamlit
- Designed user-friendly interfaces for real-time model predictions

API Development & Integration

- Created RESTful APIs using FastAPI
- Implemented GET, POST, PUT, DELETE methods
- Integrated ML models with backend services

RAG-based AI Applications

- Worked on Retrieval-Augmented Generation pipelines
- Combined data retrieval with generative AI for intelligent responses

CERTIFICATIONS

- AI Fundamentals and the Cloud – Amazon Web Services
- AI Workflow: Feature Engineering and Bias Detection – IBM
- Machine Learning for All – University of London
- Machine Learning Certification – Simplilearn
- Learn to code with AI – Scrimba
- App Deployment, Security & Infrastructure Automation – Packt
- Building Systems with the ChatGPT API – DeepLearning AI
